

Case Study: Corporate waste

# Canva Business Pickup

## About the partnership

Canva first partnered with ReSmart in 2020 to collect tricky-to-recycle items from their offices – in line with their commitment to sustainable office spaces.

Canva set up a ReSmart recycling station in the office, with bins collecting soft plastics, e-waste & misfit items.

## Results

**979kg**  
resources diverted  
from landfill

**73,021kg**  
CO2 emissions  
prevented

“With ReSmart, we have been able to get rid of our problematic waste by using their easy and reliable app.”  
Dan Bloom – Canva
